

**ARCHITECTURAL/ENGINEERING/CONSULTING FIRMS
OFFERING SERVICES FOR INDOOR AIR QUALITY
PROBLEMS, MOLD ASSESSMENT OR ABATEMENT***

***There are no Federal, Kansas or local registrations, certifications or required qualifications for the indoor air industry. This list was compiled by the Kansas Department of Health and Environment to assist in the location of firms that have indicated they provide indoor air consultation, mold abatement and related services. The names on this list were obtained by company request or other sources. KDHE does not endorse or recommend any specific company for indoor air quality testing, for mold abatement or any other indoor air problem. This list does not represent a complete or exclusive compilation of available services. Names of other firms may be obtained from the telephone yellow pages or other sources.**

1405 S. Mosley
Wichita, Kansas 67211
(316) 265-0012

Thompson & Associates
7 Village Plaza
Liberal, Kansas 67901
(620) 626-5206

It is important to ask for references, qualifications, what will be done, and the expected cost of the work. It is also advisable to contact more than one company and get multiple estimates prior to hiring a company to perform environmental work.

Here are some suggestions of questions you can ask:

1. Are the individuals conducting the testing certified by any of the following professional organizations: American Industrial Hygiene Association (AIHA), Industrial Air Quality Association (IAQA), American Indoor Air Quality Council (AmIAQC), or the Mid-Atlantic Environmental Hygiene Resource Center (MEHRC)? Are they members of any of the industry's professional organizations?
2. Mold testing is seldom needed. If you see mold, it means you have mold, and testing to determine the type or strain will not be of any benefit to you and will be expensive. If the inspector says it is necessary to collect samples, ask how it will help, and if the samples will they be analyzed by an AIHA accredited laboratory? A current listing of accredited environmental microbiology laboratories is available at <http://www.aiha.org/qs/reports/anylist.aspx?type=2>. Sample analysis by an accredited lab ensures that the highest level of QA/QC is followed
3. Is the mold inspector or their firm affiliated with, either directly or indirectly, a remediation firm? There might be a conflict of interest if a company who inspects or assesses the problem also would be the company to perform the remediation work.
4. Does the inspector or inspection firm carry professional liability insurance (with mold coverage if that is the issue)? It would be helpful to request a copy of their insurance certificate showing current coverage.
